

What have we achieved (and what we haven't)

an instant overview

What have we achieved

- order out of chaos (but not too much)

What have we achieved: out of chaos

- Remember yesterday morning?
- (and read the deliverables)

What have we achieved: order

- Identifying realistic aspirations
- Mid term view
using next meetings,
aiming at next deliverables
- Understanding how resources can be used
(human and organisational)

What have we achieved: order, but not too much

- Tolerance
values of different resources
valuing debate
- Hearing critical voices
aka keeping us honest
- Preserving ambition

(and what we haven't)

- Common language
very partial!!
- Applications and their implications
- Sacrifice
Ask not what HUMAINE can do for you,
Ask what you can do for HUMAINE

Last but not least

- Community
 - ‘since we are computer scientists’
 - ‘I am just a social psychologist’

Why not

- ‘I am an affect scientist’?
- But that’s just verbal
 - Watch the body language
- Thanks
