The licensee agrees to the conditions of use specified herein. After signing this agreement, (s)he will be provided with a personal password allowing to download the speech data and necessary labelling files. The licensee is allowed to use these data exclusively for taking part in the INTERSPEECH 2016 Computational Paralinguistics Challenge. Papers submitted to the INTERSPEECH 2016 Special Session *Computational Paralinguistics Challenge* that make use of these corpora further need to cite

*Björn Schuller, Stefan Steidl, Anton Batliner, Julia Hirschberg, Judee K. Burgoon, Alice Baird, Aaron Elkins, Yue Zhang, Eduardo Coutinho, Keelan Evanini: "The INTERSPEECH 2016 Computational Paralinguistics Challenge: Deception, Sincerity & Native Language", Proceedings INTERSPEECH 2016, ISCA, San Francisco, USA, 2016.*

The corpus is handed over without guarantee. No legal claims of any kind can be derived from accepting and using the corpus. The rights belong to CU. The licensee shall give appropriate references to CU, as well as to the name and reference of the Language Resources. CU is not liable for any damage resulting from receiving, installing or using the corpus or any other files provided by CU in this context. Handing over the corpus or any other files which have been provided by CU containing information derived from it (labelling files, etc.) by the licensee to any third party may not be done without the expressed written consent of CU. Any models, derived from data containing the corpus may - just as the speech data themselves - only be used for scientific, non-commercial applications. This licence expires after the camera ready paper submission deadline for INTERSPEECH 2016. If the licensee wants to use the data/labelling files after this date, another agreement of use has to be made between CU and the licensee.
